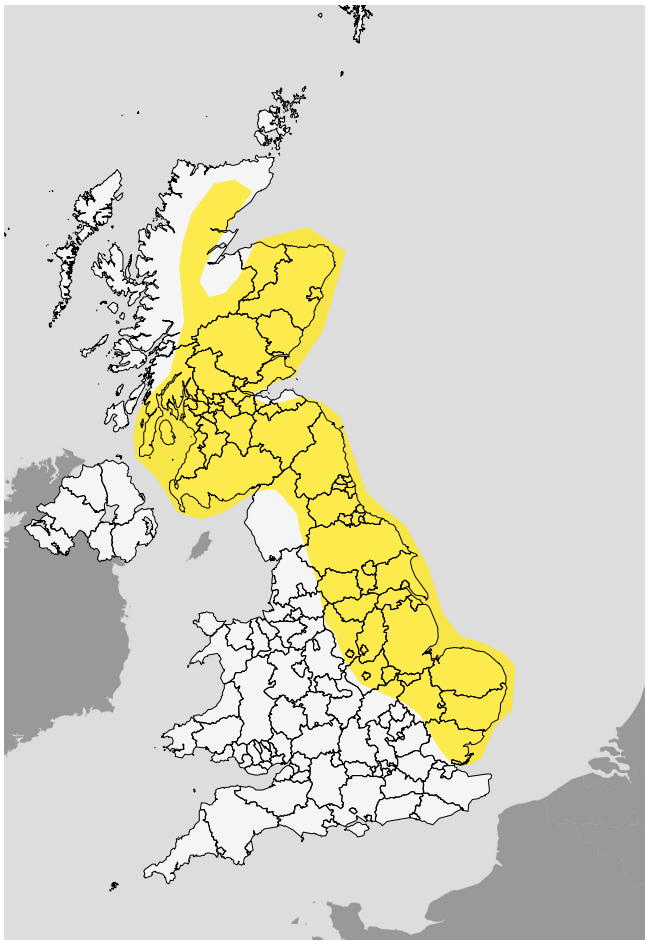
Yellow warning
Rain

Between
06:00 Thu 19 Oct 2023 and
06:00 Sat 21 Oct 2023



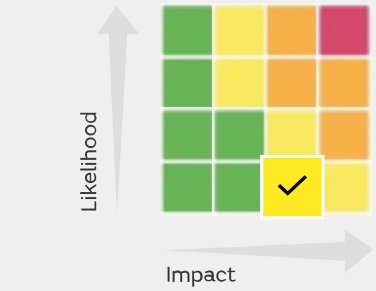
Storm Babet will bring a period of very wet weather to many eastern parts of England, the Pennines and Scotland later this week.

What to expect

- Spray and flooding could lead to difficult driving conditions and some road closures
- Where flooding occurs, there is a chance of delays or cancellations to train and bus services
- There is a small chance that homes and businesses could be flooded, causing damage to some buildings
- There is a slight chance of power cuts and loss of other services to some homes and businesses
- There is a small chance of fast-flowing or deep floodwater, and communities being cut off by flooded roads

Further details

While there is still some uncertainty in detail, there is the potential for periods of heavy, prolonged and potentially disruptive rainfall to develop on Thursday and perhaps continue into Saturday across parts of the area. Widely 20 to 40mm of rain is expected, but some upland areas of northern England and Scotland could see as much as 70-100 mm of rain. A separate Amber warning is in place for parts of eastern Scotland where higher rainfall amounts are likely to cause greater impacts.



✓ Very low likelihood of medium impacts
